

VOTE FRAUD

E&Os (Endorsements & Objections)

Endorsement: The spectre of the furtive fraud voter taking names from tombstones is dwarfed by political parties actively recruiting students to register and vote on election day. Because of New Hampshire's small population and our "First In The Nation" presidential primary we are a tempting target for those who wish to influence national opinion.

It is this voting by nonresidents who can skew a bond issue or alter the decision on a pressing fiscal or social ballot issue that is rightly the decision of those who are legitimate residents; the bearers of the social and financial burdens imposed by the polling place outcome.

Prevalent in college towns the residents of these towns are at the mercy of those who should be well behaved guests but are instead vandals of the quality of life that the legitimate residents are paying for and are most entitled to enjoy.

Objections: Same day registration was established to enlarge the franchise of all citizens.

The Coalition of New Hampshire Taxpayers recommends that the legislature and state government officials investigate all allegations of improper voting and prosecute those who would steal the ballot of the legal voter by the canceling power and authority of the legitimate ballot.

CNHT recommends legal prosecution of all fraudulent voters.
